# C702 Cyber-shot™

---

Your Imaging phone

Sony Ericsson

# Preface

## Purpose of this document

---

This White paper will be published in several revisions as the phone is developed. Therefore, some of the headings and tables in this document contain limited information. Additional information and facts will be forthcoming in later revisions.

The aim of this White paper is to give the reader an understanding of the main functions and features of this phone.

People who can benefit from this document include:

- Operators
- Service providers
- Software developers
- Support engineers
- Application developers

This White paper is published by:

Sony Ericsson Mobile Communications AB,  
SE-221 88 Lund, Sweden

# Product overview

---

With its splash and dust protection C702 Cyber-shot™ gives the user the opportunity to take an array of exciting pictures. The protective cover keeps the camera lens clean and dry. The phone's steady grip materials and one-hand operation together with the active lens cover are the basis for quick and easy picture taking. Considering that the camera has Cyber-shot™ UI (User Interface) 2.0, 3.2 megapixel camera with auto focus, face detection and Photo fix, C702 Cyber-shot™ gives complete access to a world of taking impressive pictures.

When taking a picture with C702 Cyber-shot™ the user will have pictures saved with a geographical location tag by default. With geo tagging, the user can sort the pictures saved in the phone geographically instead of chronologically.

Features include:

- 3.2 megapixel camera with auto-focus, face detection and photo light
- Easy-to-use horizontal digital camera menu
- Photo fix to improve an under-exposed picture immediately
- The ability to share images using mobile blogging
- Built-in GPS (Global Positioning System)
- Video blogging
- Web browser supporting HTML
- Dynamic Web pointer for Web browsing
- PictBridge™ to print pictures directly on a printer
- The latest in 3G/HSPDA/EDGE technology for voice and video telephony
- Slide shows with music, transitions and more
- 3D gaming
- Web feeds
- FM radio with RDS and track identification
- A handsfree and USB cable provided in the kit
- A memory card reader for Memory Stick Micro™ (M2™) memory cards

# Key features

---

## **TrackID™**

TrackID™ enables the user to identify a track playing on the built-in radio, or a track playing in the room. A few seconds of the song is sampled, the phone connects to an online database, which identifies the song and returns Title, Artist and Album information.

## **3.2 Megapixel camera**

The main camera is 3.2 megapixel and includes 2.0x digital zoom with auto focus, face detection and photo light to take quality pictures with ease. The horizontal user interface allows for easier camera handling. The main camera records video clips with 2.0x digital zoom, and saves them in the phone or on a memory card. A picture or video clip can be shared as a picture message, email message or blog with friends or family. Pictures can also be transferred to another phone or computer using any available transfer method, such as Bluetooth™ or USB cable.

## **Face detection**

The camera brings an off-centre face into focus if there are people in the picture. The camera will find and focus on a face and make it look sharp.

## **Video call camera**

There is also a QCIF (Quarter Common Intermediate Format) video call camera. Accessing video call mode via the main menu activates the QCIF video call camera.

## **Splash and dust resistant**

Being an IP54 (Ingress Protection) product together with the protective lens, the phone and camera can withstand dust and water splashes.

## **2.2-inch colour screen**

The large 2.2-inch (240x320 pixels) full graphic QVGA 262k colour screen enhances viewing, facilitating high-quality multimedia and entertainment.

## **Built-in GPS (Global Positioning System)**

With the built-in GPS, and location based services such as preloaded Google Maps™ for mobile and a free three-month trial version of Wayfinder Navigator™, you can find out where you are and how to find your way. The built-in GPS supports geo tagging. When a photo is taken it is tagged with geo data, meaning that the location where the photo was taken can be shown on a map. The phone also features the sports application Tracker, which allows you to keep track of your speed, distance, route and energy consumption during training.

## **Video camera**

The built-in camera captures a video recording and saves it in the phone or on a memory card. A video clip can be shared as a picture message or email with friends or family, or using any available transfer method such as Bluetooth™ wireless technology. The phone supports QVGA size video recording.

## **Web feeds**

A built-in RSS (Really Simple Syndication) Reader is used in combination with the Internet browser. When browsing, frequently updated content such as news headlines or podcasts can be received as feeds.

## **Web feeds ticker**

News headlines you subscribe to can be shown in standby using Web feeds.

## **HTML Web browser support**

Browse the Internet and look at Web sites in a different way with Access NetFront™ 3.4 – an HTML browser which supports a complete Web standard suite.

## **Landscape browsing support**

View Web pages in landscape mode.

## **Mobile blogging**

Send pictures and video clips using the Internet to show on your personal blog, allowing people easy access to view and comment on your pictures and video clips.

## **Photo tags**

Navigate through your captured photos and thousands of downsized photos transferred from your computer. View captured photos and video clips in an intuitive timeline view. Play animated slide shows with music and different moods. Tag your photos to find them faster.

## **PictBridge™ – Camera printing**

Print pictures from the phone using the USB cable directly to a printer, without a computer or photo editing software.

## **Push email**

The phone supports push email, a method of pushing new email messages automatically to mobile devices. Push email increases mobile email usability, with email being delivered in the background (similar to SMS or MMS).

## **Media**

A unique Sony Ericsson media experience. All media can be accessed directly from the desktop. Navigate seamlessly through captured photos and video clips, pictures, photo tags, music, videos and more.

## **Music player**

Located in Media. Play downloaded music and audio. The navigation system enables you, for example, to browse through your favourite tracks and create simple playlists.

## **Video player**

Located in Media. Play saved and downloaded video clips.

## **Sony Ericsson Media Manager**

Music, photo and video clip management software is available on the CD which is included in the kit. Transfer music, video clips and photos to and from your phone. Prepare files for transfer even when your phone is not connected to your computer. Search for and select music on your computer or audio CDs and convert your existing audio tracks to formats that are suitable for mobile use before transferring them to your phone. You can also subscribe to feeds such as video and music podcasts.

## **PlayNow™ 5.0**

A unique and easy-to-use direct-link for downloading ringtones, full track music, games, themes and wall-papers. PlayNow™ offers best-selling content for mobile download. Users can preview content before purchase. Users have access to a catalogue of thousands of tracks and ringtones from both international and local labels.

By combining the PlayNow™ catalogue with unique applications like TrackID™ users are presented with a My TrackID™ list and TrackID™ Charts by country, created by TrackID™ users around the world. These charts are based on what songs other users are searching for and want to hear the most. PlayNow™ supports MP3 and Windows Media DRM file formats for music.

## **3D Gaming**

Gaming is a very popular feature in mobile phones. At purchase there are premium quality 3D games preloaded. With Java™, users can download new games and skill levels to further enhance their entertainment experience.

## **Java™**

Download additional applications which are information- and entertainment-based. This gives users a chance to personalize the functions and features in their phones, and developers the opportunity to create new applications. Java Platform 8 (JP-8.3), supports a range of new Java programming features including instant messaging (chat) and presence-based functionality, handling banking, payment transactions, user identification and authentication through secure encryption technology.

## **Bluetooth™ wireless technology**

Several devices (simultaneous Bluetooth™ connections) can be connected up to 10 metres (33 feet) away using Bluetooth wireless technology. For example, when the phone rings, it can be answered with a Bluetooth headset, and images can be sent to another phone at the same time. Several mobile phones can take part in a Bluetooth-supported game and the phone and a computer can exchange data such as images, video clips, vCards, music files and calendar data. Bluetooth version 2.0 and Enhanced Data Rate (EDR) is supported.

## **Bluetooth™ audio streaming**

Listen to audio in compatible devices. By connecting a Bluetooth Advanced Audio Distribution Profile (A2DP) compatible accessory, such as a stereo Bluetooth headset or a Bluetooth music receiver, you can enjoy high quality stereo audio streaming wirelessly from the phone. Many A2DP accessories also support the Bluetooth Audio Video Remote Control Profile (AVRCP) allowing you to control the player in the phone using the accessory interface.

## **USB 2.0 mass storage**

When connecting the phone to a computer using the provided USB cable, the memory in the phone appears on the computer screen as a removable disk along with other disks and drives in the computer. You can then quickly and easily drag and drop items such as images, documents, music and video clips between folders in the phone and the computer.

## **Media Transfer Protocol (MTP)**

With Media Transfer Protocol you can transfer media files and synchronize playlists when the phone is connected to the computer using the USB cable. It is possible to use MTP in Media transfer mode or Phone mode. MTP is supported by Windows Media Player 11 and higher in Windows XP and in Windows Vista™ it is also supported.

## **Personal Information Management (PIM)**

Stay up-to-date with everyday events by synchronizing phone contacts, calendar appointments, tasks and notes in the phone with similar programs in a computer. The USB cable which comes with the phone, or the built-in Bluetooth feature can be used together with the synchronization software which is available on the CD in the kit or can be downloaded from [www.sonyericsson.com/support](http://www.sonyericsson.com/support). Smart search your contacts and call list for phone numbers or names from standby.

## **Common Internet File System (CIFS)**

The Common Internet File System enables file transfer to and from your phone. The phone acts as a file server which allows you to copy and move files between your PC and the server. You can use this feature when connected using the USB cable or the Bluetooth connection.

| <b>Video blogging</b><br><br>Share video clips over the Internet on your personal Web site. The size of uploaded video clips is dependent on customizations | Yes                         | Yes                         | Yes                               |
| <b>Video call camera</b>  | Yes                         | Yes                         | Yes                               |
| <b>Video calling</b><br><br>When you make a video call, the other party can be seen on the screen. The service requires UMTS/WCDMA                          | Yes                         | Yes                         | Yes                               |
| <b>Video call talk time</b>   | Target<br>Up to 2 hours     | To be decided               | Target<br>Up to 1 hour 30 minutes |
| <b>VideoDJ™</b><br><br>Create video sequences by combining different clips and adding music and images  | Yes                         | Yes                         | Yes                               |

| <b>Feature</b>  | <b>C702<br/>Cyber-shot™</b> | <b>C902<br/>Cyber-shot™</b> | <b>K850i</b> |
|---|-----------------------------|-----------------------------|--------------|
| <b>Video player</b><br><br>Play video clips you have transferred or downloaded. Transfer video clips to another phone or a computer using an available transfer method                  | Yes                         | Yes                         | Yes          |
| <b>Video streaming</b><br><br>Real-time streaming of video clips, for example, live cam. Media can also be downloaded and saved in the phone memory                                     | Yes                         | Yes                         | Yes          |
| <b>Viewfinder</b><br><br>When using the camera, a picture can be previewed before it is captured  | Yes                         | Yes                         | Yes          |
| <b>Voice control</b><br><br>Voice answer, reject and call. Assign voice commands to items in the phonebook. When a call is made, the voice command can be used instead of pressing keys | Yes                         | Yes                         | Yes          |
| <b>Voicemail</b><br><br>Support for voicemail operator service including automatic answering and message recording  | Yes                         | Yes                         | Yes          |
| <b>Wayfinder Navigator™</b><br><br>A free three-month trial version of Wayfinder Navigator is included  | Yes                         | No                          | No           |
| <b>WAP 2.0 XHTML</b><br><br>A mobile Internet standard to access specially designed Internet sites. WAP 2.0 supports colour and interactive lists                                       | Yes                         | Yes                         | Yes          |
| <b>Web feeds</b><br><br>Frequently updated content delivered as feeds via a Web site, for example, news headlines in the browser  | Yes                         | Yes                         | Yes          |
| <b>Web feeds ticker</b><br><br>View news headers in standby   | Yes                         | No                          | No           |
| <b>Weight</b>   | 105.5 g (including battery) | 106.6 g                     | 118 g        |

# Facts and figures

---

This chapter offers readers a detailed listing of all the technical data relating to the product. Comprehensive descriptions of performance and technical characteristics are presented in table format for quick and easy access.

# Technical specifications

---

## General technical data

|                         |   |
|-------------------------|---|
| System                  | Quad-band GSM Release 5 recommendations, GSM-850, GSM 900, e-GSM 900, GSM 1800, GSM 1900<br>Single-band UMTS/HSDPA 2100 supported |
| Speech coding           | HR, FR, EFR, AMR, , supported where available, for high speech quality.   |
| GSM SIM/ UMTS USIM card | GSM SIM - GSM 11.11, UMTS SIM - 3GPP™ TS 31.101.<br>Small plug-in card, 1,8 V and 3 V.  |
| Memory                  | Up to 145 MB internal (depending on software configuration/file content) + extra slot for supported memory cards.                 |
| Data transfer speeds    | Up to 3.6 Mbps (downlink, HSDPA, cat 6)<br>Up to 384 Kbps (uplink, WCDMA R99)   |

## Performance and technical characteristics

| Property   | WCDMA 2100  |
|--|---|
| Frequency range (MHz)                                      | TX:1920-1980<br>RX:2110-2170  |
| Channel spacing  | 5 MHz with<br>200 kHz channel rasters                                       |
| Number of channels   | 277   |
| Modulation   | QPSK (WCDMA R99)<br>QPSK/16 QAM (HSDPA)                                     |
| TTI  | 10 ms (WCDMA R99)<br>2 ms (HSDPA)   |
| TX Phase Accuracy  | Error Vector Magnitude: <17.5%  |
| Duplex spacing   | 190 MHz   |
| Frequency stability  | +/- 0.1 ppm   |
| Voltage operation (nominal)                                | 3.6 V   |
| Transmitter RF power output                                | 24 dBm Class 3 (0.25 W peak)  |
| Transmitter Output impedance                               | 50 ohm  |
| Transmitter Spurious emission (according to specification) | < -36 dBm up to 1 GHz<br>< -30 dBm over 1 GHz<br>(according to 3GPP™ spec.) |

| <b>Property</b>  | <b>WCDMA 2100</b>                             |   |
|--|---|---|
| Receiver RF sensitivity                                    | Better than -106.7 dBm @ 12.2 kbps CS voice   |   |
| Receiver RX Bit error rate                                 | < 0.1%  |   |
| <hr/>  |   |   |
| <b>Property</b>  | <b>GSM 850</b>                                | <b>GSM 900/<br/>E-GSM 900</b>                 |
| Frequency range (MHz)                                      | TX: 824–849<br>RX: 869–894                    | TX: 880–915<br>RX: 925–960                    |
| Channel spacing  | 200 kHz                                       | 200 kHz                                       |
| Number of channels   | 124 Carriers *8 (TDMA)                        | 174 Carriers *8 (TDMA)                        |
| Modulation   | GMSK  | GMSK  |
| TX Phase Accuracy  | < 5° RMS Phase error (burst)                  | < 5° RMS Phase error (burst)                  |
| Duplex spacing   | 45 MHz  | 45 MHz  |
| Frequency stability  | +/- 0.1ppm                                    | +/- 0.1ppm                                    |
| Voltage operation (nominal)                                | 3.6 V   | 3.6 V   |
| Transmitter RF power output                                | 33 dBm Class 4<br>(2 W peak)                  | 33 dBm Class 4<br>(2 W peak)                  |
| Transmitter Output impedance                               | 50 ohm  | 50 ohm  |
| Transmitter Spurious emission (according to specification) | < -36 dBm up to 1 GHz<br>< -30 dBm over 1 GHz | < -36 dBm up to 1 GHz<br>< -30 dBm over 1 GHz |
| Receiver RF sensitivity                                    | Better than – 104 dBm                         | Better than – 102 dBm                         |
| Receiver RX Bit error rate                                 | < 2.4%  | < 2.4%  |
| <hr/>  |   |   |
| <b>Property</b>  | <b>GSM 1800</b>                               | <b>GSM 1900</b>                               |
| Frequency range (MHz)                                      | TX: 1710–1785<br>RX: 1805–1880                | TX: 1850–1910<br>RX: 1930–1990                |
| Channel spacing  | 200 kHz                                       | 200 kHz                                       |
| Number of channels   | 374 Carriers *8 (TDMA)                        | 299 Carriers *8 (TDMA)                        |
| Modulation   | GMSK  | GMSK  |
| TX Phase Accuracy  | < 5° RMS Phase error (burst)                  | < 5° RMS Phase error (burst)                  |
| Duplex spacing   | 95 MHz  | 80 MHz  |

| Transmitter RF power output                                | 30 dBm Class 1<br>(1 W peak)                  | 30 dBm Class 1<br>(1 W peak)                  |

| <b>Property</b>  | <b>GSM 1800</b>       | <b>GSM 1900</b>       |
|--|-----------------------|-----------------------|
| Transmitter Output impedance                               | 50 ohm                | 50 ohm                |
| Transmitter Spurious emission (according to specification) | < - 30 dBm            | < - 30 dBm            |
| Receiver RF sensitivity                                    | Better than – 102 dBm | Better than – 102 dBm |
| Receiver RX Bit error rate                                 | < 2.4%                | < 2.4%                |

## USSD technical data

| <b>Feature</b>  | <b>Support</b>  |
|-----------------|---|
| USSD support    | GSM Phase 1/2 (Cross-phase compatibility)   |
| Mode support    | UI-mode supported<br>SAT initiated USSD supported   |
| UI-mode details | <ul style="list-style-type: none"> <li>• It is possible to scroll the text up and down in USSD messages.</li> <li>• It is possible to highlight embedded numbers and take actions accordingly.</li> </ul> |

## GPRS technical data

| <b>Property</b>                                  | <b>Support</b>  |
|--|---|
| Compatible GPRS/EDGE and SMG specifications      | Release 99 according to ETSI specification  |
| Data rates GPRS (per time slot)                  | Coding scheme<br>CS-1: 9 Kbps<br>CS-2:13,4 Kbps<br>CS-3:15,6 Kbps<br>CS-4:21,4 Kbps (network-dependent).  |
| Data rates EDGE (per time slot)                  | Modulation & coding scheme (MCS)<br>MCS-1 (GMSK): 8,0 Kbps<br>MCS-2 (GMSK): 11,4 Kbps<br>MCS-3 (GMSK): 14,8 Kbps<br>MCS-4 (GMSK): 17,6 Kbps<br>MCS-5 (8-PSK): 22,4 Kbps<br>MCS-6 (8-PSK): 29,4 Kbps<br>MCS-7 (8-PSK): 44,8 Kbps<br>MCS-8 (8-PSK): 54,4 Kbps<br>MCS-9 (8-PSK): 59,2 Kbps |
| Medium Access Modes                              | Dynamic allocation  |
| Support of Packet Control Channels (PBCCH/PCCCH) | Yes   |
| Network operation mode                           | NOM I, II, III  |

| Property   | Support   |
|--|---|
| Support of GPRS/CS combined procedures   | Yes   |
| Network control mode   | NC0 and 2   |
| Support of access in 2 phases  | Yes   |
| Support of PRACH on 11 bits  | Yes   |
| Support of GPRS re-selection C31/ C32  | Yes   |
| Support of static and dynamic addressing   | Yes   |
| Support of power control Uplink and Downlink   | Uplink = yes, Downlink is a network feature   |
| Support of ciphering algorithms  | GEA1, GEA2  |
| Support of compression algorithms  | Yes, V42bis and IP header compression   |
| Mode of operation  | Class B and Class C modes of operation supported  |
| R Reference point  | Physical layer: Support of RS232<br>PPP is supported as L2 layer in the R reference point<br>Authentication algorithms PAP, CHAP supported  |
| IP connectivity  | PDP type IP is supported.<br>IP termination in mobile or TE (laptop, PDA) is supported  |
| PDP context  | 10 PDP context descriptions saved in the phone.<br>PDP context description is edited via application in the phone, AT-command or via OTA.<br>Simultaneous PDP contexts are supported, maximum 4   |
| SIM  | GPRS aware, as well as non-GPRS aware, SIM cards are supported  |
| AT commands  | Some of the supported commands:<br>AT+CGDCONT - DEFINE PDP CONTEXT<br>AT+CGEQREQ - Quality of Service Profile (REQUESTED)<br>AT+CGEQMIN - Quality of Service Profile (Minimum Acceptable)<br>AT+CGATT - PACKET DOMAIN SERVICE ATTACH OR DETACH<br>AT+CGACT - PDP CONTEXT ACTIVATE OR DEACTIVATE<br>AT+CGDATA - ENTER DATA STATE |
| For more information, see <a href="http://www.sonyericsson.com/developer">www.sonyericsson.com/developer</a> |   |

## SIM AT services supported

| Service             | Mode | Support |
|---------------------|------|---------|
| CALL CONTROL BY SIM |      | Yes     |
| MO SMS CONTROL      |      | Yes     |

| Service              | Mode  | Support    |
|----------------------|---|------------|
| DATA DOWNLOAD TO SIM | Cell Broadcast<br>SMS   | Yes<br>Yes |

| GET CHANNEL STATUS |      | Yes     |

## User Interaction with SIM AT

### Display text

Text of up to 240 characters (120 UCS coded) is supported.

Text clearing times are 5-20 seconds with a 60-second time-out limit for the user to clear the text. 'Key' responses:

- 'End key' – Proactive session terminated by user.
- 'Back' – Backward move in proactive session.

MSK clears the screen if the command is performed successfully.

### Get inkey

Prompt for a one-character input. Pressing 'Ok' without entering a character gives warning message "Text too short". 'Key' responses:

- 'C' clears current character.
- 'End key' terminates the proactive session.
- 'Back' – Backward move in the proactive session.
- 'OK' – Command performed successfully.

### Get input

Prompt for character input. The phone will refuse to accept further input when maximum response length is exceeded. UI Maximum Response lengths:

- Digits Only – 160 characters.
- SMS default alphabet characters – 160 characters.
- Hidden Characters (digits only) – 20 characters.

'Key' responses:

- 'C' clears current character.
- 'End key' terminates the proactive session.
- 'Back' – Backward move in proactive session.
- 'OK' – Command performed successfully.

### Select item

Scroll to highlight item for selection. 'Key' responses:

- Navigational key press down – Scroll down list.
- Navigational key press up – Scroll up list.
- End key terminates proactive session.
- 'Back' – Backward move in proactive session.
- 'OK' – Command performed successfully.

### Send short message

Alpha Identifier text is displayed, if it is present. Otherwise, there is no user indication if the customization for default text is not enabled. If the customization for default text is enabled, and there is no Alpha Identifier, default message "Sending message" is displayed. Default responses are "Message failed" or "Message sent" for the customization enabled case with no Alpha Identifier.

'Key' responses:

- End key or 'Back' ends the proactive session.

### Set up call

If you are on a call when the commands 'Set up Call', 'Putting all other calls on hold' are sent, the user will see the "Let SIM card setup call" user confirmation text. If 'OK' is pressed the current call will be put on hold and the new call set up. If the phone is on a call when the command 'Set Up Call, disconnecting all other calls' is sent, the user will see the 'Let SIM card setup call' user information text. If the 'OK' key is pressed the current call will be disconnected and the new call set up.

### Set up menu

Incorporates a SIM Application Toolkit Menu Item into the ME's main menu structure.

If an Alpha Identifier is supplied in the Set Up Menu command, this is used as the SIM AT entry in the ME's main menu. If null alpha identifier is supplied

and several items are found in the menu, the default title “ONLINE SERVICES” is used. If the SIM AT Menu Item is selected by pressing ‘Select’,

all the items sent in the Set Up Menu command will be available for selection, in the same way as the Select Item command.

| UTF-7             | BIG-5    |
| UTF-8             |          |

### Coding Text (Outgoing MMS)

|       |
|-------|
| UTF-8 |
|       |

## Short Messaging Service

| Feature                   | Support  |
|---------------------------|--|
| SMS Service Centre Number | It is possible to pre-load the SMS Service Centre Number   |
| Pictures                  | It is possible to insert a picture or an icon into the text message. EMS compliant mobile phones will be able to see the picture correctly |
| Reply to messages         | It is possible to reply to received messages by SMS, MMS, voice message and email  |
| Capacity storage          | Depending on the available user memory.<br>Recommended maximum: 10000  |

| <b>Feature</b>   | <b>Support</b>  |
|--|---|
| Input methods:   | Predictive writing and multitap                             |
| Copy and paste words   | Yes   |
| Teaching of predictive words that are not in the predictive dictionary     | Yes   |
| Possibilities when creating a message:                                     |   |
| Save a sent message in a "Sent items" folder                               | Yes   |
| Insert a line in the message   | Yes   |
| Assign a validity period to the message                                    | Yes   |
| Use predefined messages  | Yes   |
| Possibilities when receiving a message:                                    |   |
| Reply to the sender  | Yes   |
| Forward the message  | Yes   |
| Save the message on the SIM card   | Yes   |
| Get delivery time and date   | Yes   |
| Possibilities of the previously sent message:                              |   |
| Delivery report of the message   | Yes (if requested when sending)                             |
| Forward the message  | Yes   |
| Save the message on the SIM card   | Yes   |
| Know the remaining capacity storage  | Yes, > 95% full warning, capacity on SIM when saving to SIM |
| Possibilities of the previously received message:                          |   |
| Reply to the sender  | Yes   |
| Save the message in the inbox  | Yes   |
| Forward the message  | Yes   |
| Know the remaining capacity storage  | Yes, > 95% full warning, capacity on SIM when saving to SIM |
| Supported ways for replying to a received SMS:                             |   |
| Via SMS, MMS, voice message, email   | Yes   |
| Via phone call (set up a call to the number contained in the message body) | Yes   |
| Via Web browser (go to the Web address contained in the message body)      | Yes   |

| Feature   | Support   |
|---|---|
| Via USSD session  | No  |
| Print via infrared  | No  |
| Possibility to enable the user to send a text message to a list of recipients | Yes   |
| Possibility to write an email address as a recipient address                  | Yes, if email gateway is present                        |
| SMS storage   | In the phone memory, on the SIM card, or on memory card |
| Nokia Picture Messaging   | Yes   |

## Enhanced Messaging Service

| Feature   | Support   |
|---|---|
| Level of compliance supported by the phone regarding the specifications described in release 99 | Enhanced Messaging Service (EMS) according to the standard 3GPP™ TS 23.040 v4.3.0, with the addition of the ODI feature from 3GPP™ TS 23.040 v5.0.0   |
| Number of messages that the phone is able to handle to generate a concatenated message          | 10  |
| Capacity storage  | Depending on the available user memory. Recommended maximum: 10000  |
| Outgoing messages   | <p>It is possible to:</p> <ul style="list-style-type: none"> <li>• See how many short messages an EMS message consists of before sending it.</li> <li>• Choose whether to send the message or not after writing it.</li> </ul>  |
| Incoming messages   | <ul style="list-style-type: none"> <li>• A signal is heard once all parts of the message have been received or when a time-out occurs.</li> <li>• It is possible to re-use the content of an EMS message. Sounds, pictures, and animations can be inserted in a new message, if the object is not protected using ODI.</li> </ul> |
| Delivery report for concatenated messages   | A receipt is received in the phone when all parts of a concatenated message have been delivered if a delivery report is requested when it is being sent   |
| Insert objects  | It is possible to add pictures, animations and sounds to an EMS message   |
| Sounds  | Chimes high, chimes low, ding, tada, notify, drum, claps, fanfare, chords high, chords low  |
| I-melody  | Yes, version 1.2  |

| Feature   | Support   |
|---|---|
| Melodies  | <p>It is possible to:</p> <ul style="list-style-type: none"> <li>• Receive (always), send using EMS (if not copyright protected).</li> <li>• Download melodies and commercial tunes from the Web.</li> </ul>  |
| WBMP  | Yes   |
| Picture sizes   | 16x16, 32x32 pixels, variable size in black and white   |
| Pictures  | <p>It is possible to:</p> <ul style="list-style-type: none"> <li>• Edit pictures using PhotoDJ™.</li> <li>• Receive (always), send using EMS (if not copyright protected).</li> <li>• Download pictures from the Web.</li> </ul>  |
| Animations  | <p>There is support for the following animations: Angry, Crying, Flirty, Happy, Kiss, Sad, Tongue, Wow, Confused, Devil, Glasses, Indifferent, Laughter, Sceptical and Wink, as defined in 3GPP™ TS 23.040 v4.3.0.</p> <p>It is possible to send and receive animations</p> |
| TP-PID field value given by the phone before sending an EMS message | 0x00  |

## Multimedia Messaging Service

| Feature   | Support   |
|---|---|
| MMS/CSD parameters and MMS/GPRS parameters placement  | <p>MMS is bound to an MMS profile.</p> <p>A MMS profile is bound to a Data account.</p> <p>A data account contains either CSD parameters or GPRS parameters and possibly proxy settings</p> |
| Capacity storage  | Depending on the available user memory. Recommended maximum: 500  |
| Possibility to pre-configure the MMS parameters in the factory  | <ul style="list-style-type: none"> <li>• MMS/CSD: Yes</li> <li>• MMS/GPRS: Yes</li> </ul>   |
| Possibility to configure the MMS parameters by OTA provisioning   | <ul style="list-style-type: none"> <li>• MMS/CSD: Yes</li> <li>• MMS/GPRS: Yes</li> </ul>   |
| Possibility for all the parameters from the parameters set to be OTA provisioned at the same time                           | <ul style="list-style-type: none"> <li>• MMS/CSD: Yes</li> <li>• MMS/GPRS: Yes</li> </ul>   |
| Possibility for only one parameter, in the set of parameters, to be OTA provisioned   | <ul style="list-style-type: none"> <li>• MMS/CSD: No</li> <li>• MMS/GPRS: No</li> </ul>   |
| Supplier indication of realized interoperability tests between its MMS User Agent and MMS Relay/Server from other suppliers | Yes   |

| Feature  | Support  |
|--|--|
| Support of a standard procedure for OTA provisioning of MMS parameters       | OMA Client Provisioning 1.1  |
| Functionalities that the user is able to set during message composition:     | <ul style="list-style-type: none"> <li>• Message subject</li> <li>• Message priority</li> <li>• Email recipient address</li> <li>• Message Cc, Bcc recipient(s) address(es)</li> <li>• Delivery report request</li> <li>• Read report request</li> <li>• MSISDN recipient address</li> <li>• Delivery time</li> <li>• Validity period</li> </ul>                                 |
| From where can the user insert multimedia elements into multimedia messages: | File Manager<br>Photo album<br>Camera<br>Contacts<br>Calendar<br>Task<br>Note<br>Browser (vBookmark)<br>VideoDJ™<br>PhotoDJ™<br>MusicDJ™<br>Sound recorder   |
| Possibility for sent messages to be memorized into a folder in phone memory  | Yes  |
| Actions that the user can perform after message retrieval:                   | <ul style="list-style-type: none"> <li>• Reply to the sender of the message SMS/MMS</li> <li>• Reply to the sender and to Cc, Bcc people SMS/MMS</li> <li>• Forward the message</li> <li>• Delete the message</li> <li>• Save message in a dedicated folder</li> <li>• Call the sender of a message</li> <li>• Save item</li> <li>• Mark as unread</li> <li>• Details</li> </ul> |
| Multimedia codecs/formats supported for audio                                | AAC, AMR, MPEG Layer 3, Real 8, AWB, WAV, MP4, MIDI, iMelody, 3GPP™, XMF, M4A, WMA   |
| Multimedia codecs/formats supported for video                                | MPG4, 3GPP™, SDP, Real 8, WMV  |
| Multimedia codecs/formats supported for image                                | JPEG, GIF87, GIF89A, PNG, SVG, WBMP, BMP   |
| Supported formats for message presentation:                                  | <ul style="list-style-type: none"> <li>• Message body plus attachments (email presentation)</li> <li>• SMIL version as described in OMA MMS IOP document version 1.2</li> </ul>  |
| Maximum message size that can be handled by the phone                        | Content Class and Creation mode are applied. Maximum size can also be customized   |

| Feature  | Support   |
|--|---|
| Maximum number of objects supported in a message | 30 objects is standard. It is possible to increase the number through configuration |
| Maximum text size                                | 5,000 characters/text   |

## Email client technical data

| Feature                       | Support  |
|-------------------------------|--|
| Bearer type (IP)              | Yes  |
| Bearer type GSM Data (IP)     | Yes, GPRS, HSCSD, ISDN and analog  |
| Character sets                | ISO: ISO-8859-1, ISO-8859-2, ISO-8859-5, ISO-8859-7, ISO-8859-9, ISO-8859-10<br>Windows: Windows-1251, Windows-1252, Windows-1254, Windows-1255, Windows-1258<br>US-ASCII<br>Unicode: UTF-7, UTF-8, UTF-16<br>Japanese: Shift_JIS, ISO-2022-JP<br>Cyrillic: KOI8-R<br>Simplified Chinese: GB2312, GB18030<br>Traditional Chinese: Big5<br>Thai: TIS-60 |
| OTA provisioning solution     | OMA Client Provisioning 1.1  |
| Protocols                     | POP3 and IMAP4   |
| Push email                    | IMAP IDLE (extension of IMAP4 Rev1), OMA Email Notification 1.0 and scheduled checking, Exchange ActiveSync® (EAS)   |
| Secure email                  | SSL/TLS, both port methods (POPS/IMAPS) and STARTTLS   |
| HTML mail                     | Yes (tags removed)   |
| Thumbnailed image attachments | Yes  |
| Message management            | User selectable inbox size, save messages to Memory Stick, arrange messages by date, size and Email address.   |
| ESMTP                         | Yes  |
| Background sending            | Yes  |

# Connectivity

---

## Bluetooth™ technical data

| Dimension                      | Support  |
|--------------------------------|--|
| Bluetooth capability statement | This phone supports Bluetooth Specification, version 2.0 with enhanced data rate (EDR)   |
| Bluetooth profiles             | Advanced Audio Distribution Profile<br>Audio/Video Remote Control Profile<br>Basic Imaging Profile<br>Dial-up Networking Profile<br>File Transfer Profile<br>Generic Access Profile<br>Generic Object Exchange Profile<br>Handsfree Profile<br>Headset Profile<br>Human Interface Device Profile<br>Object Push Profile<br>Personal Area Networking Profile<br>Phonebook Access Profile<br>Serial Port Profile<br>Synchronization Profile<br>SyncML OBEX binding |
| Connectable devices            | All products supporting Bluetooth spec. 1.1, or higher, and at least one of the profiles above   |
| Coverage area                  | Varies due to radio performance between the connected devices and the occurrence of obstacles. Up to 10 metres (33 feet)   |
| Transmission power             | Class 1, typical +3 dBm or 2 mW  |
| Frequency band                 | 2.4 GHz – the unlicensed ISM band  |
| Power consumption              | GSM host processor excluded: <ul style="list-style-type: none"> <li>• Standby, Bluetooth On mode: &lt;0.6 mA</li> <li>• Voice to headset (HV3 master): 11 mA (7 mA with EDR functionality, 2EV3 master). Dependent on various parameters such as if the phone is master or slave</li> <li>• Data mode average: 27mA at 172.8 Kbps symmetrical (DH1)</li> </ul>   |
| Data transmission rate         | <ul style="list-style-type: none"> <li>• Data speed at least 800 Kbps on a Dial-up Networking connection (requires access to HSDPA network and may be limited by capacity situation on the 3G base station)</li> <li>• Data speed typically 1.0 Mbps on an Object Push connection between two phones (in case of using similar phones and if no other Bluetooth devices are connected)</li> </ul>  |

## OMA Data Synchronization (SyncML™) technical data

| Feature   | Support for Sync ML   |
|---|---|
| SyncML compliance   | The phone is fully SyncML compliant, having passed SyncML Conformance testing. OMA DS 1.2 or OMA DS 1.1.2 is used depending on configuration and both are supported in Server-alerted synchronization   |
| Basic data formats  | Contacts: vCard 2.1, Calendar: vCalendar 1.0 (vEvent)<br>Tasks: vCalendar 1.0 (vTodo)<br>Notes: text/plain, Bookmarks:vBookmark 1.0   |
| Possibility for operators to extend SyncML functionality  | The device may be configured to include preset SyncML settings, and to control whether SyncML 1.1 or SyncML 1.2 will be used  |
| Transport method for SyncML messages  | HTTP, HTTPS, OBEX (USB, Bluetooth)  |
| Possibility for the user to configure login parameters (for example, username and password) to access the remote database | Yes   |
| Configuration parameters that can be entered/modified by the user   | Server URL, Username, User PWD, Paths to databases (Calendar, Contacts, Notes, Tasks and Bookmarks), UserID and PWD for databases, Databases to be synchronized (On/Off), Internet profile, Synchronization interval, Server ID and Server PWD, permission to allow server-alerted synchronization and roaming options. Can be provisioned with OMA Client provisioning v1.1 and OMA Device Management v1.2 |
| Ability to deal with multiple servers   | Yes   |
| Ability to perform conflict resolution actions  | Yes   |

## Microsoft® Exchange ActiveSync®

| Feature  | Support for Exchange ActiveSync  |
|--|--|
| Protocol version   | The phone supports version 2.5 of Microsoft Exchange ActiveSync  |
| Supported applications   | Email, Calendar, Phonebook   |
| Transport method used  | HTTP, HTTPS  |
| Possibility for the user to configure login parameters for remote server | Yes  |
| Configuration parameters that can be entered/modified by the user        | Server URL, username, domain name, password, applications to sync, email message size, email attachment size, email date range, message alert sound, calendar date range, interval sync, secure connection, roaming option |

| <b>Feature</b>                         | <b>Support for Exchange ActiveSync</b> |
|--|--|
| Ability to use multiple servers        | No                                     |
| Ability to perform conflict resolution | No                                     |

## Web browser technical data

| <b>Feature</b>               | <b>Support in the browser</b>  |
|------------------------------|--|
| Bookmarks                    | Yes, with folders and sorting supported  |
| Bookmark Export/Import       | Yes, can be sent and received using vBookmark format using Bluetooth™, SMS, MMS and email  |
| Browser compliancy           | <p>The Web browser is compliant with the following standards:</p> <p>HTML ver. 4.01<br/> XHTML Basic 1.0<br/> XHTML 1.1, Module-based XHTML<br/> XHTML Mobile profile<br/> WML 1.3<br/> Cascading Style Sheets, level 2 revision 1, CSS 2.1 Specification<br/> Wireless CSS Specification, Version 26-Oct-2001 (WAP-239-WCSS-20011026-a)<br/> ECMA-script according to specifications found at<br/> <a href="http://www.ecma-international.org/publications/standards/Stnindex.htm">http://www.ecma-international.org/publications/standards/Stnindex.htm</a><br/> ECMAScript Mobile Profile<br/> AJAX<br/> Document Object Model Level 2 (DOM 2)<br/> Scalable Vector Graphics, Mobile SVG Profile: SVG Tiny, version 1.2</p> <p>For further details, see the <i>WAP User Agent strings and profiles for Sony Ericsson mobile phones</i> Developers guidelines at Developer World <a href="http://developer.sonyericsson.com/">http://developer.sonyericsson.com/</a></p> |
| Browser version              | Access NetFront 3.4  |
| Cache                        | Yes (size 2 MB )   |
| Character sets *             | <p>Most standard character sets, among others UTF-8 (Default), UTF-16, USASCII, Latin1, UCS2.</p> <p>For updated and detailed information, see the <i>WAP User Agent strings and profiles for Sony Ericsson mobile phones</i> Developers guidelines at Developer World <a href="http://developer.sonyericsson.com/">http://developer.sonyericsson.com/</a></p>   |
|                              | <p>* When creating pages, it is recommended to always save the page contents as UTF-8.</p>   |
| Clear cache                  | Yes, persistent. By user interaction, at SIM card change or master reset   |
| Frames                       | Full Frame support: Frames, IFrames  |
| Image formats and animations | GIF (interlaced and non-interlaced) WBMP, JPEG, PNG, BMP and SVG. Animated GIFs, animated SVG and Flash  |

| <b>Feature</b>  | <b>Support in the browser</b>   |
|---|---|
| Schemes   | Wtai, mailto:, smsto:, tel, rtsp, http, https   |
| Streaming   | Progressive download, RTSP, Java script controls  |
| Web feeds   | Ticker, podcasts, enclosures, OPML import. No support for ATOM  |
| <b>User agent profile</b>   |   |
| User Agent Profiles   | Yes, list of client characteristics - for example screen size.<br>For details, see the <i>WAP User Agent strings and profiles for Sony Ericsson mobile phones</i> Developers guidelines at Developer World<br><a href="http://developer.sonyericsson.com/">http://developer.sonyericsson.com/</a> |
| URL sent pointing to the UA profile at the beginning of browser session | Yes. For details, see the <i>WAP User Agent strings and profiles for Sony Ericsson mobile phones</i> Developers guidelines at Developer World<br><a href="http://developer.sonyericsson.com/">http://developer.sonyericsson.com/</a>  |
| <b>Download</b>   |   |
| OMA download functionality  | Yes   |
| HTTP GET solution to download content/ Uses browser for download        | Yes   |
| Other download content  | Yes. No download limit when using HTTP protocol   |
| Download application/product memory check                               | Yes   |
| Downloaded object solution  | Yes. The user is informed where the content is saved and asked if it should be used at once or later  |
| UAP indication for downloading  | Yes   |
| Other features  | Yes. Save, delete, forward, use, manage   |
| Object formats  | All formats can be downloaded and saved, but only formats supported by the phone can be used by the phone   |
| Resume  | Yes   |
| Background download   | Yes   |
| Progressive download  | Yes   |
| Streaming   | Yes   |
| <b>Browser navigation</b>   |   |
| Selection keys  | Yes. Two selection keys and centre navigation key   |
| Separate/dedicated back or erase keys                                   | Yes   |
| Display backlight on when browsing                                      | Yes   |
| Predictive writing  | Yes   |

| <b>Feature</b>  | <b>Support in the browser</b>  |
|---|--|
| “http://” string displayed automatically when entering URLs | Not displayed but the “http://” is added automatically to the URL  |
| “www” added automatically when entering URLs                | No   |
| Combined Search/Go To input field                           | Intelligent input field changes appearance (Search or Go to) depending on user input. “www”, “.com” and other URL syntax can be used to trigger the Go To appearance |
| <b>Internet network features</b>                            |  |
| Bluetooth (as local connection)                             | Yes  |
| Infrared (as local connection)                              | No   |
| Network settings  | Yes  |
| PPP Authentication  | PAP, CHAP supported  |
| Security  | HTTPS authentication<br>TLS version 1<br>SSL version 3<br>WIM on SIM ICC<br>X.509 certificate support, Mobile Profile<br>WPKI OTA download of trusted certificates   |
| USB (as local connection)                                   | Yes  |
| <b>PUSH</b>   |  |
| <b>Content types</b>  |  |
| Service Indication (SI)                                     | Yes  |
| Service Loading (SL)  | Yes  |
| Cache Operation (CO) content type                           | No   |
| Session Initiation Application (SIA)                        | Yes  |
| <b>Man Machine Interface</b>                                |  |
| SI/content retrieval postponing                             | Yes  |
| SI menu structure accessibility                             | Messaging, Inbox   |
| SL reception warning  | The user can make a choice if a dialogue is wanted or not before loading the SL  |
| SIA reception warning                                       | Yes  |
| Cache size limitations                                      | The oldest push in the inbox will be discarded   |
| Number of push messages                                     | Depends on the size of the push messages. Around 20 push messages with a size of 1024 bytes URL and 1024 bytes Indications for Service Indication can be saved.      |

| <b>Feature</b>             | <b>Support in the browser</b>   |
|----------------------------|---|
| Push deactivate            | Yes   |
| Dynamic push menu changes  | No. There are no changes in the menus when activating/deactivating push   |
| <b>Security</b>            |   |
| Mechanisms for push        | None  |
| Trust with PPG             | Sending a SIA is the most reliable  |
| WSP push sessions          | No  |
| HTTP push sessions         | The White List (a setting to allow push messages only from certain addresses) is supported for IP address   |
| SMS connection-less push   | The White List (a setting to allow push messages only from certain addresses) is supported for SMS Center   |
| Denial of service/spoofing | Setting to select when to allow push messages: Always, always ask or never. There is also a setting to select whether to allow push messages from all senders or only from certain addresses (the White List) |

## Client Provisioning

| <b>Feature</b>                  | <b>Support</b>   |
|---------------------------------|--|
| <b>Provisioning types</b>       | <b>OMA Client Provisioning (v1.1)</b>  |
| Total Parameter sets            | 10 (shared between the provisioning types)<br>< or = 10 (total number of data accounts)  |
| Parameter set list              | See the <i>Device Management v3 Developers Guideline</i> at<br>Developer World <a href="http://www.sonyericsson.com">http://www.sonyericsson.com</a>   |
| Factory pre-configuration       | Yes. This also provides the possibility to lock a setting  |
| <b>Bearer</b>                   |  |
| SMS                             | Uses security mechanism (SEC) methods according to OMA-WAP-ProvCont-v1_1-20050428-C(see<br><a href="http://www.openmobilealliance.org">www.openmobilealliance.org</a> ).<br>For NETWPIN the user is asked to accept to install received settings. For USERPIN, USERNETWPIN and USERPINMAC the user is subsequently asked to enter a PIN code that is a shared secret between the service provider and the user |
| Carrier reset/provisioning      | Yes, but not if the set is pre-configured in the factory and locked  |
| SWIM                            | Not used for provisioning.<br>The SWIM is only used for wireless security, both SSL/TLS connections and digital signatures   |
| <b>Applicative provisioning</b> |  |
| Preferred bearer customization  | Yes  |

| Feature                     | Support  |
|-----------------------------|--|
| Other applications/features | Yes (MMS, Email, OMA Data Synchronization, Wireless Village, OMA Device Management, Streaming) |
| <b>Technologies</b>         |  |
| OMA Client Provisioning     | Yes, Client Provisioning version 1.1   |
| Nokia/Ericsson OTA          | No   |
| Openwave OTA                | No   |
| Other                       | No   |
| Provisioning bearer         | SMS  |

# Abbreviations

## **3GPP™**

3rd Generation Partnership Project

## **A-GPS**

Assisted GPS

## **AAC**

Advanced Audio Coding

## **AAC+**

High Efficiency AAC v.1

## **AJAX**

Asynchronous JavaScript and XML

## **AMR**

Adaptive Multi Rate. Audio format for speech sounds

## **AMR-NB**

Adaptive Multi Rate Narrow Band

## **AMR-WB**

Adaptive Multi Rate Wide Band, a more efficient codec that supports speech with higher quality

## **API**

Application Programming Interface

## **Bluetooth PAN**

Bluetooth Personal Area Network

## **CS**

Circuit Switched

## **CSD**

Circuit Switched Data

## **DRM**

Digital Rights Management. Controlling copying and distribution of contents, with respect to intellectual property rights

## **DTMF or Touch Tone**

Dual Tone Multi-Frequency signal. Codes sent as tone signals. Used for telephone banking, accessing an answering machine, etc.

## **EDGE**

Enhanced Data Rates for GSM Evolution

## **e-GSM**

Extended GSM. New frequencies specified by the European Radio Communications Committee (ERC) for GSM use when additional spectrum is needed (network-dependent). It allows operators to transmit and receive just outside GSM's core 900 frequency band. This extension provides increased network capability

## **eAAC+**

High Efficiency AAC v.2

## **EDR**

Enhanced Data Rate

## **EFR**

Enhanced Full Rate, speech coding

## **EMS**

Enhanced Messaging Service. Allows the user to add simple pixel pictures and animations, sounds and melodies to a text message. The EMS 3GPP™ standard also includes text formatting

## **ETSI**

European Telecommunications Standards Institute

**FM**

Frequency Modulation of the (radio) carrier wave

**FR**

Full Rate, speech coding.

**GIF**

Graphics Interchange Format

**GPS**

Global Positioning System

**GPRS**

General Packet Radio Services

**GSM**

Global System for Mobile Communications. GSM is the world's most widely used digital mobile phone system, now operating in over 100 countries around the world, particularly in Europe and Asia-Pacific.

The GSM system family includes GSM 850, GSM 900, GSM 1800 and GSM 1900. There are different phases of roll-out for the GSM system and GSM phones are either phase 1 or phase 2 compliant

**HR**

Half Rate, speech coding

**HSCSD**

High Speed Circuit Switched Data

**HSDPA**

High Speed Downlink Packet Access

**HTML**

HyperText Markup Language

**HTTP**

HyperText Transfer Protocol

**IrDA**

Infrared Data Association

**JPEG**

Joint Photographer Expert Group

**MIDI**

Musical Instrument Digital Interface

**ME**

Mobile Equipment

**MMI**

Man-Machine Interface. See UI

**MP**

Megapixel

**MP3**

Short for "MPEG-1 layer 3", an audio coding scheme

**MPEG4/MPG4**

Moving Picture Experts Group. MPEG-4 is a standard used primarily to compress audio and visual digital data.

**MT**

Mobile Termination

**ODI**

Object Distribution Indicator

**OMA**

Open Mobile Alliance

**OTA**

Over The Air

**PDA**

Personal Digital Assistant

**PDP**

Packet Data Protocol

**PIM**

Personal Information Management

**PNG**

Portable Network Graphic

**QCIF**

Quarter Common Intermediate Format

**RDS**

Radio Data System

**RSS**

Really Simple Syndication

**RTSP**

Real Time Streaming Protocol session control.

**SI**

Service Indication

**SL**

Service Loading

**SIM card**

Subscriber Identity Module card – a card that must be inserted in any GSM-based mobile phone. It contains subscriber details, security information and memory for a personal directory of numbers. The card can be a small plug-in type or credit card-sized, but both types have the same functions. The phone uses the small plug-in card.

**SMS**

Short Messaging Service. Allows messages of up to 160 characters to be sent and received via the network operator's message centre to a mobile phone

**SP-MIDI**

Scalable Polyphony MIDI

**SS**

Supplementary Services

**SSL**

Secure Socket Layer

**TLS**

Transport Layer Security

**TTI**

Transmission Time Interval

**UI**

User Interface

**URL**

Uniform Resource Locator.  
The global address of documents and other resources on the World Wide Web

**USSD**

Unstructured Supplementary Services Data

**vCard**

vCard automates the exchange of personal information typically found on a traditional business card, for use in applications such as Internet mail, voicemail, Web browsers, telephony applications, call centres, conferences, PIMs /PDAs, pagers, fax, office equipment and smart cards. vCard is specified by IETF

**VGA**

Video Graphics Array

**WAV**

Waveform audio format

**WMA**

Windows Media Audio

## **WMA Pro**

Windows Media Audio Professional

## **WBMP**

Wireless BitMap.  
A graphic format optimized for mobile computing devices

## **WCDMA**

Wideband Code Division Multiple Access

## **WML**

Wireless Markup Language. A markup language used for authoring services, fulfilling the same purpose as HyperText Markup Language (HTML) does on the World Wide Web (WWW). In contrast to HTML, WML is designed to fit small handheld devices

## **WWW**

World Wide Web

## **XHTML**

Extensible HyperText Markup Language

## **XML**

Extensible Markup Language

## Trademarks and acknowledgements

---

The Bluetooth™ word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Sony Ericsson is under licence.

The Liquid Identity logo, PlayNow, BestPic, SensMe, VideoDJ, MusicDJ, TrackID and PhotoDJ are trademarks or registered trademarks of Sony Ericsson Mobile Communications AB.

WALKMAN, Mega Bass, Memory Stick Micro, Cyber-shot, M2 and Sony are trademarks or registered trademarks of Sony Corporation.

NetFront is a trademark or a registered trademark of ACCESS Co., Ltd.

PictBridge is a trademark or registered trademark of Canon Kabushiki Kaisha Corporation.

Ericsson is a trademark of Telefonaktiebolaget LM Ericsson.

TrackID™ is powered by Gracenote Mobile MusicID™. Gracenote and Gracenote Mobile MusicID are trademarks or registered trademarks of Gracenote, Inc.

Google™ and Google Maps™ are trademarks or registered trademarks of Google, Inc.

Wayfinder and Wayfinder Navigator are trademarks or registered trademarks of Wayfinder Systems AB.

Real, RealAudio, RealVideo are the trademarks or registered trademarks of RealNetworks, Inc.

The IrDA Feature Trademark is owned by the Infrared Data Association and used under licence there from.

XHTML™ is a registered trademark of the W3C.

Microsoft®, Windows® Vista and ActiveSync are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.

Adobe Flash Lite are trademarks or registered trademarks of Adobe Systems Incorporated in the United States and/or other countries.

3GPP™ is a trademark of ETSI in France and other jurisdictions.

SyncML is a trademark or registered trademark of Open Mobile Alliance Ltd.

Java and all Java based trademarks and logos are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and other countries.

End-user license agreement for Sun Java™ J2ME™:

1. Restrictions: Software is confidential copyrighted information of Sun and title to all copies is retained by Sun and/or its licensors. Customer shall not modify, decompile, disassemble, decrypt, extract, or otherwise reverse engineer Software. Software may not be leased, assigned, or sub licensed, in whole or in part.

2. Export Regulations: Software including technical data, is subject to U.S. export control laws, including the U.S. Export Administration Act and its associated regulations, and may be subject to export or import regulations in other countries. Customer agrees to comply strictly with all such regulations and acknowledges that it has the responsibility to obtain licenses to export, re-export, or import Software. Software may not be downloaded, or otherwise exported or re-exported (i) into, or to a national or resident of, Cuba, Iraq, Iran, North Korea, Libya, Sudan, Syria (as such listing may be revised from time to time) or any country to which the U.S. has embargoed goods; or (ii) to anyone on the U.S. Treasury Department's list of Specially Designated Nations or the U.S. Commerce Department's Table of Denial Orders.

3. Restricted Rights: Use, duplication or disclosure by the United States government is subject to the restrictions as set forth in the Rights in Technical Data and Computer Software Clauses in DFARS 252.227-7013(c) (1) and FAR 52.227-19(c) (2) as applicable.

All other trademarks and copyrights are the property of their respective owners.
